

NAME

pyFAI-drawmask – Draw a mask for integration

DESCRIPTION

usage: pyFAI-drawmask file1.edf file2.edf ...

Draw a mask, i.e. an image containing the list of pixels which are considered invalid (no scintillator, module gap, beam stop shadow, ...). This will open a window and let you draw on the first image (provided with different tools (brush, rectangle selection...)) When you are finished, click on the "Save and quit" button.

positional arguments:

FILE Files to be processed

optional arguments:

-h, --help

show this help message and exit

-v, --version

show program's version number and exit

The mask image is saved into file1-masked.edf. Optionally the script will print the number of pixel masked and the intensity masked (as well on other files provided in input)
